HOW TO READ THE CATALOGUE

Present catalogue illustrates all the body parts making up the X1/9 and serviced as spare parts; each part is identified by a part number which, if not followed by a date, is valid for all circulating versions - the date that may follow a given part number indicates from which M.Y. the part was changed.

By knowing year of manufacture and SERIAL NUMBER, printed on DATA PLATE, it is possible to identify the correct part numbers for spares.

Each illustrating plate, on the upper right hand corner, shows a date which indicates the latest change undergone by the parts therein illustrated.

Each series of illustrating plates is preceded by an index of subgroups which summarizes the parts therein included.

The illustrating plates are followed by a parts index where all parts are listed in numerical progressive sequence and each part shows description, quantity and subgroup where used; on the microfiche this index is in the two columns on the left hand side, while on the bottom line from left to right you find the index of the subgroups and above each one of them the relative illustrating plates.
